ABOUT

3D Character Artist. I create game-ready models for Unreal Engine 5 and Unity across the full pipeline: sculpting, retopology, UVs, baking, PBR texturing and engine assembly. I have commercial experience and also handle props and hard-surface. English B2.

EXPERIENCE

3D Modeler — Visuva 2026 – Present
Off-road vehicle manufacturing
- Hard-surface: body panels and engineering parts
- Retopology of 3D scans, textures and vehicle renders

Freelance 3D Artist 2024 – Present
Self-employed · various clients
- Low-poly assets for a mobile game (Unity)
- 3D mascot for an online school and props for renders
- Rig transfer between characters, Unity import

Indie Game · Unreal Engine 5, team 2025-2026
- Environment assets: models, textures, assembly in UE5

Solo Game · Unity 2024-2025
- All 3D content: models, textures, engine import

EDUCATION & COURSES

Siberian Federal University — Computer Games and Application Development, student 2023–2027

FlippedNormals — Introduction to Anatomy 2025

Hafez Yadollahi — AAA Game Character Creation 2026

FastTrackTutorials — AAA Game Character Creation 2025

SOFTWARE

ZBrush
Blender
Substance Painter
Marmoset Toolbag
Marvelous Designer
R3DS Wrap
Photoshop
Unreal Engine 5
Unity

SKILLS

- Sculpting from concepts
- Anatomy, realism and stylization
- Animation-ready retopology
- UV unwrapping and baking
- PBR texturing
- Cloth simulation
- Materials and assembly in UE5
- Low-poly for mobile games
- Hard-surface and props
- 3D-print-ready models
- Blender scripts & plug-ins
- AI: 2D/3D generation, LLMs
